Pavlos Polydoras

Digital Transformation & AI-Driven Data Leader

Executive technology leader with 20 years' experience delivering secure, scalable systems across research, government and enterprise sectors.

About

I've spent twenty years building systems that matter – from EU research platforms handling cross-border data exchange to real-time analytics processing millions of social posts daily. Today I architect enterprise AI platforms that let entire organizations build their own AI-powered automations – designing the gateways, identity layers, agent frameworks, and MCP infrastructure that make self-service AI possible at scale.

I've built and scaled teams from Athens to Seoul, but I still write code every week. I don't ask my teams to do anything I wouldn't do myself.

Experience

Lead Data & AI Architect – Holisticon Poland
Oct 2025 – Present

Designing and delivering AI platform architectures for enterprise clients across multiple concurrent engagements.

GE Appliances — Enterprise AI Control Plane: Architecture lead for self-service AI platform (~10 engineers).

- Designed Unified Platform Gateway — single entry point for agents, MCP servers, and LLMs with Okta/Auth0 identity and scope-based authorization
- Authored enterprise ADK Agent and MCP Server templates, CI/CD pipelines for Cloud Run and Vertex AI Agent Engine
- Led PI Planning (Release 1: 20 weeks, 6 epics) driving gateway evaluation, identity architecture, and MCP governance

Volvo Cars — Self-Service Analytics Agent: Co-authored proposal and architecture.

- Designed proxy MCP server bridging Snowflake and Power BI with semantic context for natural language queries across 15 enterprise data products

Tech: Python, GCP (Cloud Run, Vertex AI Agent Engine, BigQuery), Azure (OpenAI, Container Apps), ADK, N8N, MCP, A2A, Snowflake, Power BI, Okta/Auth0, OIDC/JWT, LiteLLM, OpenAI/Gemini/Claude

VP of Engineering & General Manager, Greece – RAW Labs
Jul 2021 – Nov 2025

Lead creation of chat and analytics services built on client data using MXCP framework.

- Architect AI models and agent-based applications aligned with customer objectives
- Coordinate engineering teams and manage stakeholder relationships
- Set up and manage the Greece company branch (operations, hiring, budgeting, compliance)
- Led cross-functional teams delivering enterprise AI solutions for major clients

Tech: Python, Scala, Java, AWS (Expert), GCP, Azure, LangChain, OpenAI, MCP/MXCP, Keycloak, Auth0 · Key Projects: Vodafone Site Ranking, Swiss Statistics Smart Search, UAE National Economic Register

Chief Technology Officer – Palowise
Jan 2019 – Jun 2021

Oversaw all technical operations for SaaS platform delivering real-time social and web analytics.

- Designed scalable ingestion pipelines processing millions of social media posts daily with multilingual NLP
- Built analytics dashboards providing customized insights for enterprise clients
- Mentored engineering teams and aligned technology roadmap with business goals

Tech: Python, Scala, Spark, Elasticsearch, Kafka, PostgreSQL, Docker, Kubernetes, AWS · Key Projects: PaloPro Analytics, palo.gr, Cosmote Social Observability

Senior Software Architect – Benefits Science
Apr 2014 – Dec 2018

Technical lead for analytics platform enabling employers and consultants to optimize benefits plans.

- Designed & implemented a distributed Data Lake and Big Data ETL services
- Built scalable analytics infrastructure serving enterprise clients

Tech: Java, Scala, Spark, Databricks, AWS (EC2, Lambda, EMR, S3, RDS, Redshift, Athena, QuickSight, Glue), PostgreSQL

Senior Software Architect – UBITECH
Sep 2010 – Mar 2014

Developed secure, high-availability platforms for cross-border civil-status data exchange (RENAPER, ICCS-CIEC).

- Led core software, security and infrastructure design for RENAPER and ICCS-CIEC initiatives
- Implemented PKI-based authentication and encryption schemes

Tech: JavaEE, EJBCA, jBPM, PKI, Cryptography, Oracle, JBoss, Spring, Web Services

Software Developer – Hellenic Army
Mar 2010 – Nov 2010

Designed and implemented software solutions for critical information systems during national service.

Tech: Java, C#, .NET Framework, SQL Server, Oracle

Software Developer & Researcher – University of Athens
Nov 2005 – Feb 2010

Systems architect on EU research projects: D4Science, Health-e-Child, DILIGENT, DL.org initiatives.

Tech: Java, XML, Web Services (SOAP), Grid Computing, PostgreSQL, Eclipse RCP

Software Developer – Synastria Technologies
Jan 2007 – Jan 2008

Developed BIRonet Virtual Office web application for business process management and collaboration.

Tech: JavaEE, JMS, Hibernate, MySQL, VMWare, JSF, Spring

Core Competencies

Agentic AI & ML Platforms	Digital Transformation	Team Leadership	Data Architecture
Platform & Gateway Design	Cloud & Microservices	Big Data & ETL	Identity & Security

Technical Expertise

Cloud & Infrastructure

AWS (Expert), GCP (Expert: Cloud Run, Vertex AI Agent Engine, BigQuery, IAM), Azure (Basic), Docker, Kubernetes, Workload Identity Federation, OpenTelemetry

Programming & Frameworks

Python, Scala, Java, Apache Spark, JavaEE, Spring, Node.js, N8N Workflow Orchestration

Data & AI

Google ADK, LangChain, OpenAI/Gemini/Claude APIs, Gemini Live (Voice), MCP, A2A Protocol, LiteLLM, Vector DBs, DeepEval, ETL, Data Lake Architecture

Security & Enterprise

Okta SSO, Auth0, OIDC/JWT/OAuth2, PKI, Cryptography, Keycloak, API Gateway Design, Enterprise Architecture, Microservices

Education

M.Sc. in Information Technology

National & Kapodistrian University of Athens · 2004–2009

B.Sc. in Computer Science

National & Kapodistrian University of Athens · 1999–2004

Languages

Greek	English
Native	Fluent
